

The search for truth is more precious than its possession

--Albert Einstein

Google™

Google = mc^2 HISTORY

What Google means

Google is a play on the word **googol**, which was coined by Milton Sirota, nephew of American mathematician Edward Kasner, to refer to the number represented by the numeral 1 followed by 100 zeros. A googol is a very large number. There isn't a googol of anything in the universe. Not stars, not dust particles, not atoms. Google's use of the term reflects the company's mission to organize the immense, seemingly infinite amount of information available on the web.

GOOGLE HISTORY

Back before Google? Aye, there's the Rub.

According to Google lore, company founders [Larry Page](#) and [Sergey Brin](#) first met as Stanford University graduate students in computer science in 1995. A unique approach to solving one of computing's biggest challenges: retrieving relevant information from a massive set of data.

By January of 1996, Larry and Sergey had begun collaboration on a search engine called BackRub, named for its unique ability to analyze the "back links" pointing to a given website.

they bought a terabyte of disks at bargain prices and built their own computer housings in Larry's dorm room, which became Google's first data center.

Page

Brin

HISTORY

Searching for a buyer!

Touched by an angel

- Larry and Sergey decided to make a go of it on their own.
- They gave **Andy Bechtolsheim**, one of the founders of Sun Microsystems a quick demo. He had to run off somewhere, so he said, 'Instead of us discussing all the details, why don't I just write you a check?' It was made out to Google Inc. and was for \$100,000."

HAIR LOSS: TREATMENT OPTIONS

Hair loss medication products for the treatment of baldness are classified as pharmacist-only or prescription-only medicines. Early treatment of hereditary hair loss is more successful when started at the first signs of hair thinning. Treatment must be continuous to maintain re-growth. If the treatment is stopped, re-growth ceases and hair loss will start again. The effectiveness of treatment may not be measurable for up to 12 months.

Minoxidil topical lotion, such as Regaine, can slow progressive balding in hereditary hair loss, but not all hair will grow back. You should apply the lotion to your scalp while it is dry and leave it for at least 4 hours after application.

You should not exceed the recommended dose, as over-use will not achieve better or faster growth. The most common side effect is an itchy scalp.

You should always wash your hands thoroughly after applying the lotion and avoid eating if it is necessary.
